# 2023 impact report

measuring pact's mission

**At Pact**, data and evidence are at the core of who we are. They are essential to how we make decisions, adapt our programs to best fit the current context, learn from one another to improve our work and ensure we're holding ourselves to the highest standards.

We are proud to share the impact of our work through our 13th annual Measuring Pact's Mission report. The report covers our work for the 2023 fiscal year, from October 2022 to September 2023, and includes results from our global indicators in the areas of health, livelihoods, environment, capacity development, governance, responsible mining and clean energy. We also share our results by location.

With this year's report, we are pleased to also feature stories that bring the data points to life. The local organization in Ukraine that, through capacity strengthening from Pact, has improved their performance, allowing them to better protect the rights of women and girls while passing their knowledge on to other organizations. Or the mother of two daughters with medical needs who, because of Pact's signature economic strengthening model WORTH, started a business and can now provide her daughters with much needed healthcare. Or the Burmese farmer who has started a new business because of access to clean energy in his community. These stories remind us of the people, organizations and lives behind the data.

On the pages that follow, you'll see evidence of the direct impact made through our programs. Each data point represents a person or organization that has been directly reached by Pact: those who have been touched in an active way. Through the significant ripple effect that occurs when one life is impacted, millions of people in communities around the world are not captured in these numbers but have meaningfully improved their lives through our programs.

We believe it is our ethical obligation to use evidence, contribute to the larger evidence base and engage those we serve in decisions around its collection and use, and we believe this is fundamental to our vision for thriving, resilient and engaged communities leading their own development.

For more information about our methodology, contact our Learning, Evidence and Impact team, [leap@pactworld.org](mailto:leap@pactworld.org).

# global health

Achieving good health and well-being requires healthy behaviors and quality services.

Pact is at the forefront of expanding the role of communities and civil society in working to improve integrated, person-centered health and social services with government agencies and private and faith-based service providers. We work with national and local partners to improve inclusive and equitable access to community and clinical services that deliver what communities need from strengthened health and social welfare systems. Our sustainable, community-led health programming, including mental health, responds to the prevention and care needs of vulnerable children, youth, pregnant and breastfeeding women, caregivers and families and marginalized groups. Together with our local partners, we enhance their capacity to address barriers that sideline these populations. Our community-based solutions for better health – integrated with livelihoods, environment and governance approaches – facilitate local response and resilience to shocks and stresses such as war, conflict, climate crises and emerging disease risks.

PEOPLE WITH IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES

## 373

STRENGTHENED HEALTH AND SOCIAL SYSTEMS

Health is a complex system where empathetic human connection is vital. Pact's community health volunteers, like **Pheny Kanyangala**, are unsung heroes who ensure people receive the care they need. One of 1,155 Pact-supported community-based health volunteers in Zambia, Pheny provides critical assistance to the Lumwana District Hospital by providing families with information on prevention and treatment of HIV/AIDS, cervical cancer, voluntary medical male circumcision and tuberculosis. Pheny also supports families with testing, counseling and tracing services, links them to other needed services and follows up to ensure they don't miss appointments. Pheny is part of a community-based, holistic approach that is essential to ensuring individuals and families receive support where they are. Using her own life experiences, deep knowledge of the community, and understanding of healthcare systems, Pheny is one of the many community volunteers who supported the more than 1.1 million people with improved access to health care and social services through Pact's work last year.

*Pheny Kanyangala is a community-based health volunteer in Zambia.*

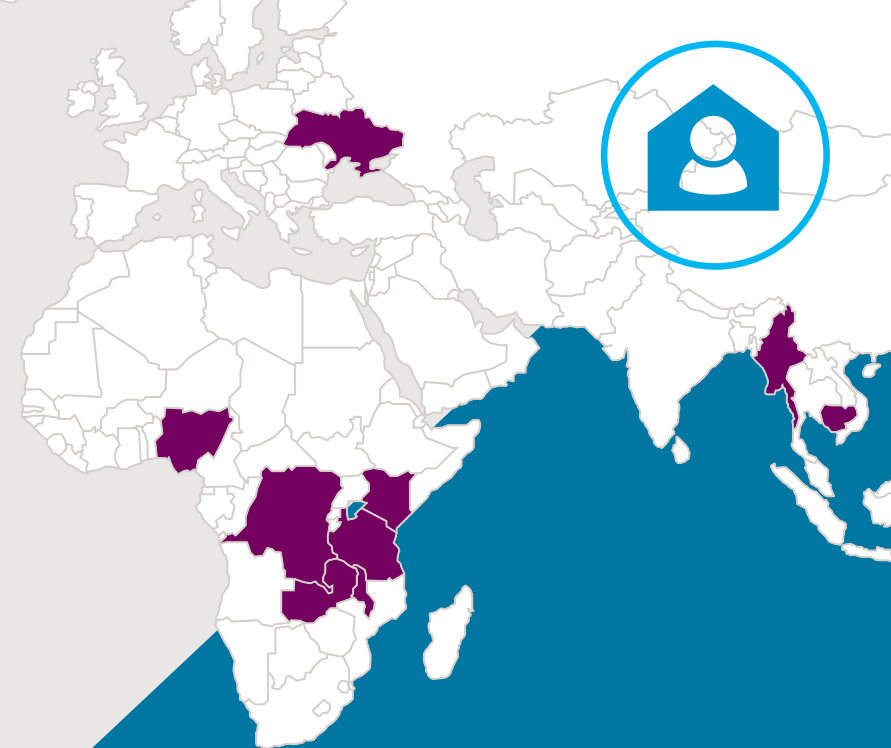

Photo credit: Pact

# livelihoods

Economic resilience and empowerment are at the core of people's ability to own their future,

especially women, youth and disadvantaged groups who tend to be most excluded from traditional market systems. Pact works hand in hand with the communities we serve to promote access to finance, support micro and small enterprise development and economic empowerment, and realize labor rights. By enhancing access to knowledge, skills and resources at the community level and engaging with governments, private-sector actors and local organizations to understand and create economic opportunity, we support the development of sustainable, resilient and inclusive livelihoods.

GROUPS WITH INCREASED ASSETS

Photo credit: Aidani Jarimo/Pact

Fatma in the green farm owned by her WORTH group.

**Fatma Ngayonga**, a 47-year-old woman in Tanzania, is among the more than 150,000 people globally who have improved their financial situation in 2023 with Pact support. Her two daughters have acute medical needs, and as the only caregiver, Fatma struggled to provide them with essential care. Fatma was introduced to a community case worker deployed by Pact, whom she now refers to as “her big sister”. The relationship was the catalyst for positive changes in her life. Fatma joined one of more than 4,600 village savings and loan groups supported by Pact in Tanzania this year alone. These groups are part of Pact’s longstanding WORTH economic strengthening model that combines financial literacy and numeracy, savings, lending and entrepreneurship skills. As a member of her local WORTH group, Fatma used a loan to start her own fruit juice business. Soon after, she participated in a skills-based training on horticulture farming and its value chain. Fatma inspired her fellow group members to try cucumber farming, which has been a success. Now Fatma can provide the healthcare her daughters need. Fatma dreams of becoming a teacher, and with her more secure financial footing, she feels like her dream is attainable.

\*Democratic Republic of Congo (DRC)

# environment

To make lasting positive change for the next generation, communities must have the skills, resources and opportunities to responsibly safeguard, while benefiting from, the natural resources around them, from fish to forests to agricultural products, and to adapt to and mitigate climate change. In partnership with local communities, governments, local organizations and the private sector, we foster sustainability in agriculture, fisheries and forestry supply chains, including the reduction of carbon emissions; strengthen local capacity and effective community-based natural resource management governance systems; and help people develop alternative and sustainable climate-resilient, nature-based enterprises.

HECTARES UNDER IMPROVED MANAGEMENT

Photo credit: Brian Clark/Pact

Hamis Nyampesi leads one of over a dozen enterprises supported by Pact that are contributing to sustainably managed fisheries in Malawi. The son of a single mother who worked in fish processing, Nyampesi focuses on working with women, teaching them more sustainable fish processing techniques that contribute to healthier fisheries, reduced environmental impacts and higher yields. He also uses his purchasing power to influence the type of fish fishers catch. He only buys mature fish that are fully developed. Through grants and technical assistance from Pact, Hamis has been able to construct new technologies such as a solar drying tent, purchase equipment for vacuum sealing fish, train workers on sustainable practices and organize group savings and loan programs among workers. Today, his company sells fish in supermarkets across Malawi, and he was recently granted a fish export permit by the Government of Malawi, drawing him closer to realizing his dream of exporting his sustainably caught and processed fish to other countries. Hamis is one of more than 620,000 people who have benefited from improvements in the management of natural resources last year through Pact's work.

*Hamis Nyampesi, the CEO of a fish processing enterprise supported by Pact, sits on a boat on the shore by Lake Malawi.*

# capacity development

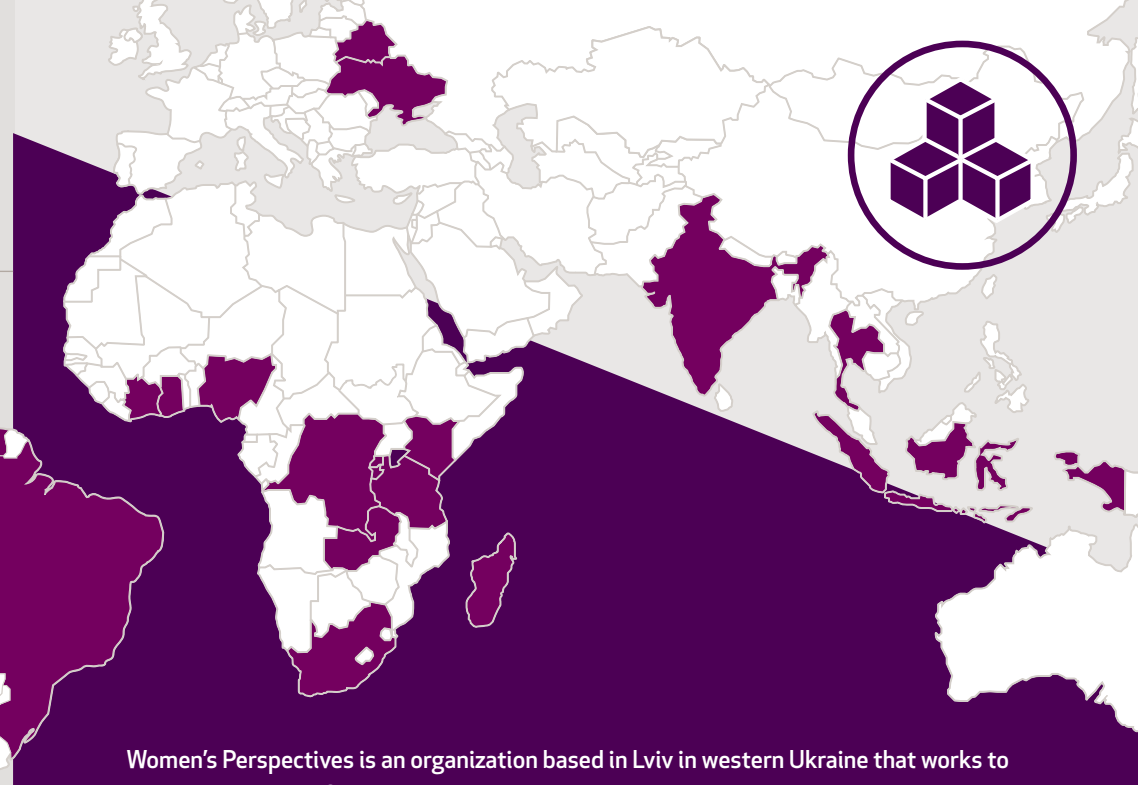

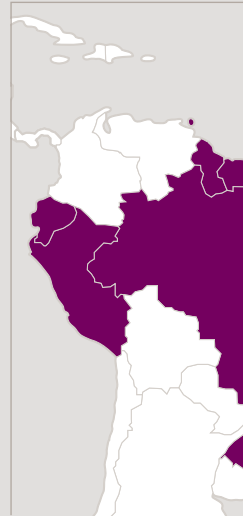

To be sustainable, communities and systems must become self-reliant.

Pact views capacity development as an asset-based, inclusive process, approach and outcome. Capacity development must be intentional, go beyond knowledge and skills transfer, maximize co-creation and co-implementation, incorporate technologies in creative ways and agilely work within complex, adaptive systems, and utilize innovation as a capacity that presents the potential for transformative change. Our capacity development work is holistic, intersecting all of our programming to best meet the needs of local actors, ensuring their leadership of the process.

Women's Perspectives is an organization based in Lviv in western Ukraine that works to protect the rights of women and girls. It is among the 775 partner organizations that have been supported by Pact this past year. Through training, mentoring and coaching from Pact, Women's Perspectives has demonstrably improved its organizational performance, increasing its score on Pact's Organizational Performance Index, a tool that measures performance improvement. With improved organizational performance, the organization is better able to serve their communities and fulfill their mission. Thanks to Women's Perspectives, an office space in Lviv has been converted to temporary housing, sheltering

hundreds of women and children fleeing hostilities in occupied parts of Ukraine. Here, women and children can recover, make use of essential services and are offered psychosocial support and art therapy. As a result of Pact's cascade approach to capacity development, Women's Perspectives is also now strengthening other women's rights organizations. They are now a hub for learning and coaching that is improving the performance of 20 local women's rights organizations across western Ukraine, contributing to increased enjoyment of human rights by women and girls and the advancement of gender equality.

# governance

Responsive, inclusive and democratic governance systems are fundamental building blocks to local development.

Pact partners with civil society, media and governments to protect and expand civic space and broaden participation in local decision-making. We strengthen local institutions and work with peace activists to foster stability and advance positive social dialogue to address longstanding intra- and intercommunal conflict. We strengthen diverse networks of civic and social actors—including community groups, national civil society organizations, private sector, government agencies and individual activists—to advance policies and collective action that positively impact local communities. This includes supporting marginalized communities such as youth, women, ethnic and religious minorities, Indigenous peoples and migrant communities to demand accountability and claim basic rights.

Venezuelan migrants receive legal guidance on accessing critical government services in Colombia.

Pact's programming works for the rights of individuals, families and communities to be understood and respected. In Colombia this year, a Pact project that has brought support to migrants fleeing dangerous conditions in other countries has shown how understanding and respect for rights leads to effective state-society engagement. Pact partnered with legal empowerment organizations such as the Federación Nacional de Personeros (Fenalper) and local universities to train more than 2,100 migrants on their rights under Colombian law. Building from these trainings, Fenalper empowered more than 150 migrant women and community leaders to refer cases to local legal clinics. Project partners then used strategic litigation to establish legal precedents for migrants to access critical services and identity papers. The Fenalper initiative alone contributed to 24 favorable decisions for migrants and Pact partners have supported 12,828 migrants to either receive legal status in Colombia or access important government services since 2020. Fenalper's story is one of nearly 72,000 in which citizens participated in initiatives that resulted in positive state-society engagement in the last year.

# responsible mining

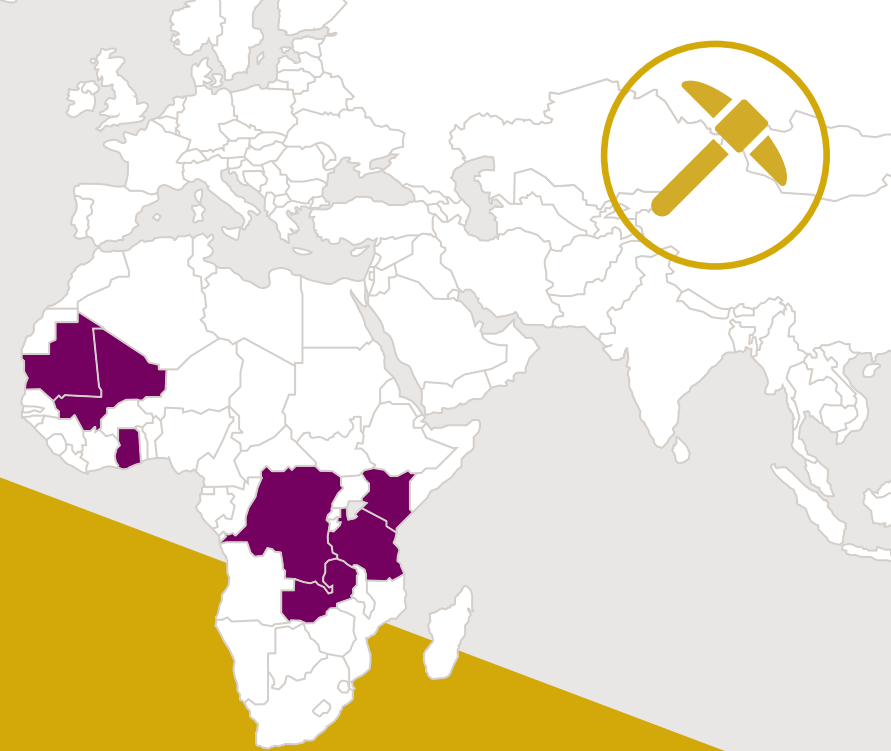

Using markets as a positive force for development means communities have the systems and opportunities they need to achieve the change they desire.

Pact's responsible mining program brings together government, industry and miners — women and men — to make artisanal and small-scale mining (ASM) safer, formalized, more productive and resilient, and to address challenges such as child labor in mining. Pact's efforts are helping to reveal and make the most of ASM's contributions to development in communities around the globe. We also work with large-scale mining firms, commodity traders, consumer-facing brands and ESG stakeholders across global supply chains to deliver a just, green energy transition for communities built on responsible mining practices and mineral sourcing.

PEOPLE SUPPORTED TO IMPROVE CONDITIONS THROUGH RESPONSIBLE MINING PROJECTS

**Micheline Numbi Longwa**, a 20-year-old woman living in Musompo in the Democratic Republic of Congo, is one of nearly 45,000 people served through Pact's responsible mining programs last year. One of 14 children, at a young age Micheline started leaving home at 6 am to sell doughnuts and munkoyo, a local drink, at mine sites. She wouldn't get home until 6 or 7 pm and earned anywhere from US\$1.80 to \$3.60 each day. In 2019, Micheline joined a Pact-led vocational training program to learn tailoring. Pact works with communities to strengthen community mechanisms to fight child labor in mining, provide older adolescents with vocational training, improve enforcement of child labor bans in the supply chain and more. After graduation, Micheline started her own business and saved enough money to return to school. Today, she is in her first year of university. Micheline continues to sew to support her needs and those of her family, but her dream is to become a lawyer and a member of parliament so that she can advocate for child protection and well-being.

# clean energy

Energy is an essential resource for all people.

Without access to reliable, sustainable and affordable sources of clean energy, starting or growing a business, delivering modern healthcare or enjoying basic needs such as lighting are out of reach for more than one billion people. Pact collaborates with governments, companies, investors and civil society organizations to connect supply and demand for, and remove market distortions to, renewable energy. We work toward a future where all people can enjoy the benefits of modern clean energy, including for productive uses, while mitigating the impacts of climate change.

# 396,097

PEOPLE WITH IMPROVED ACCESS TO ENERGY

Myanmar	395,980
Nigeria	117

Photo credit: Tagu Production

**U Chit Ko** is a 50-year-old man living in Tuomyang in the southern coastal region of Myanmar. He is one of the almost 400,000 people who have increased their access to clean energy because of Pact's support this past year. In an area with historically low access to a reliable energy source, Pact helped to install a new solar power mini grid. Leveraging this new access to energy, U Chit Ko started his own business milling grain for animal feed. U Chit Ko will soon own the motorized milling machine that he invested in after securing an interest-free loan with support from Pact. The time saved milling rather than farming and fishing has enabled him to also raise his own livestock. The sustainable solar mini grid that provides U Chit Ko with reliable power for his business is owned and managed by his village – a key aspect of Pact's commitment to communities leading their own development.

 **2** PARTNER ORGANIZATIONS WERE SUPPORTED.

## RWANDA

In Rwanda, Pact assists communities to gain lasting benefits from the more sustainable use of natural resources in collaboration with private sector partners. In doing so, Pact contributes to the economically and environmentally sustainable growth of Rwanda's mining sector. Pact also works to prevent new HIV infections and reduce vulnerability among orphans and vulnerable children and adolescent girls and young women in selected high-burden districts.

 **2** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.

 **6** PARTNER ORGANIZATIONS WERE SUPPORTED.

**1,290** INDIVIDUALS WERE DIRECTLY SERVED AND TRAINED.

## SIERRA LEONE

In Sierra Leone, Pact works to improve people's health by strengthening the capacity of local organizations to provide critical health services and by supporting implementation of the government's National Action Plan to reduce mercury use in gold mining.

 **4** PARTNER ORGANIZATIONS WERE SUPPORTED.

**39** INDIVIDUALS WERE DIRECTLY SERVED AND TRAINED.

## SOMALIA

In Somalia, Pact works closely with the justice sector and legal aid organizations to sustainably strengthen access to and understanding of justice mechanisms by individuals and communities.

 **10,021** CITIZENS PARTICIPATED IN **137** INITIATIVES RESULTING IN POSITIVE CIVIC AND STATE-SOCIETY ENGAGEMENT AND POSITIVELY INFLUENCING **4** POLICY CHANGES.

**10,021** INDIVIDUALS WERE DIRECTLY SERVED AND **23** INDIVIDUALS WERE TRAINED.

## SOUTH AFRICA

Throughout South Africa, Pact works with the government and local partners to develop organizational and technical capacity to strengthen services for orphans and vulnerable children and to deliver quality HIV adherence, treatment, care and prevention.

 **54,312** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES AND **3** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.

 **332** PARTNER ORGANIZATIONS WERE SUPPORTED.

**55,853** INDIVIDUALS WERE DIRECTLY SERVED AND **1,541** INDIVIDUALS WERE TRAINED.

## SURINAME

Pact increases Suriname's Indigenous people's influence in governance to protect the environment and rights of its Indigenous people by strengthening the capacities of indigenous organizations to access and manage financial resources and direct their own development planning and priorities. We also reduce the negative impacts of economic development on forests and water resources.

 **1** PARTNER ORGANIZATION WAS SUPPORTED.

**19** INDIVIDUALS WERE DIRECTLY SERVED AND TRAINED.

## TANZANIA

In Tanzania, Pact enables communities to take charge of their own social and economic development by improving access to health services, providing for vulnerable children, supporting families with resources for early childhood development and helping individuals in mining communities to become income secure.

 **558,452** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES, AND **109** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.

 **137,005** PEOPLE INCREASED THEIR NET INCOME, AND **4,697** SAVINGS AND MICROFINANCE GROUPS INCREASED THEIR FUNDS.

 **68** PARTNER ORGANIZATIONS WERE SUPPORTED.

 **6,703** CITIZENS PARTICIPATED IN **18** INITIATIVES RESULTING IN CIVIC AND STATE-SOCIETY ENGAGEMENT. ADDITIONALLY, **6** POLICIES WERE INFLUENCED.

 **625** INDIVIDUALS WERE SERVED BY MINING PROJECTS.

## UKRAINE

In Ukraine, Pact's work empowers citizens to push for transparent and democratic governance, advances gender equality and human rights for women and girls, accelerates efforts to achieve HIV epidemic control, supports women's economic security, and strengthens government capacity to prevent, detect and respond to public health threats, sustain critical public health services during a crisis and protect the physical and mental health of all Ukrainians.

**86,163** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES, AND **31** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.

**384** PEOPLE INCREASED THEIR NET INCOME.

**94** PARTNER ORGANIZATIONS WERE SUPPORTED.

**15,996** CITIZENS PARTICIPATED IN **702** INITIATIVES RESULTING IN POSITIVE CIVIC AND STATE-SOCIETY ENGAGEMENT AND POSITIVELY INFLUENCED **27** POLICY CHANGES.

**833,849** INDIVIDUALS WERE DIRECTLY SERVED AND **10,279** INDIVIDUALS WERE TRAINED.

## VIETNAM

In Vietnam, Pact works to catalyze private-sector finance to upscale and drive investments in agriculture, forestry and other land use toward low-emission, yet profitable business models. We also support Vietnam to achieve sustainable landscape-related climate mitigation goals as submitted to the United Nations Framework Convention on Climate Change.

**17** PARTNER ORGANIZATIONS WERE SUPPORTED.

## ZAMBIA

Pact's HIV and health programming in Zambia leads on integrating health services and providing equitable access to high-quality, client-centered services covering HIV, TB/HIV, maternal, newborn and child health, and family planning and reproductive health. Focusing on high-risk groups, Pact is also helping Zambia to reduce new HIV infections by increasing HIV awareness and the use of HIV services, and by building the capacity of local organizations to deliver high-quality programs. Pact works in partnership with government ministries on systems strengthening to support sustainable outcomes. Pact is also working to stop child labor in mining.

**241,334** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES, AND **52** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.

**525** PEOPLE INCREASED THEIR NET INCOME, AND **18** SAVINGS AND MICROFINANCE GROUPS INCREASED THEIR FUNDS.

building  
local  
promise.

Pact is an international nonprofit that works in nearly 40 countries building solutions for human development that are evidence-based, data-driven and owned by the communities we serve. Founded in 1971, Pact works with partners to build resilience, improve accountability, and strengthen knowledge and skills for sustainable social impact.
